

## ANELLI AMMORTIZZANTI / DAMPING RINGS

tipo / series **A**

Costituiti da due anelli con interposta gomma vulcanizzata, vengono applicati tra lanterna e coperchio del serbatoio per smorzare le vibrazioni generate dalla trasmissione. Resistenti agli olii minerali possono lavorare fino ad una temperatura di + 80°C, riducendo la rumorosità del sistema di circa 3÷5 decibel.

These articles are made of two rings moulded into vulcanized rubber. Interposed between the bellhousing and the tank cover, they diminish the noise created by the power transmission by approx. 3÷5 dB. The employed rubber is mineral oil resistant, max. working temperature is 80°C.
